HAIR TREATMENTS CONTINUED

Dinolite and microscopy are two different microscopes but work together to give great results on how healthy your hair and bulbs (follicles) and scalp are.

The Dino lite magnifies a single hair up to 900x magnification and looks for lactic acid , build up (plastics),sugar and can also detect other hair and scalp conditions which can cause irritation .

The microscopy is looking for how much vitamins and minerals are present inside the hair and bulbs, dryness, active hair loss, stressed and weak hair etc...
for more info please ask your stylist.

Consultation 90 minutes	£63.00
Treatment & Blow Dry 60 minutes	£48.50
Treatment, Cut & Blow Dry 90 minutes	£63.00
